Webasto ChargeConnect
Updates August 2023

Conversion of the Webasto ChargeConnect to a subscription

The month of August brings an exciting change for the Webasto ChargeConnect. From now on, the product will be available for all customers through a so-called 'Fremium' product. This means that in addition to the already existing free product, an additional product area with costs has been launched.

The free product will be automatically activated for all customers. Within this package all basic functions are usable. In addition, users can create a group and fill it with 5 charging stations to share their charging stations with others.
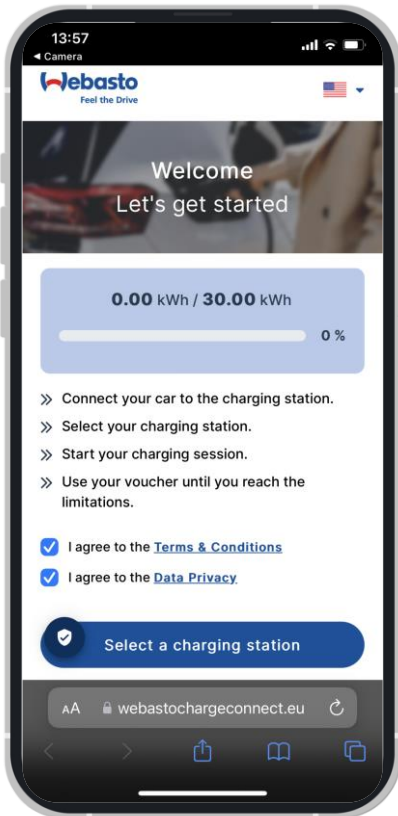

As soon as more than one group is required for the administration of the charging stations, users can switch to the paid 'Advanced' package. In addition, this package offers the possibility that the own charging stations can be authorized by reservations, or you can activate our voucher system to enable a relaxed charging process especially for guests.

Choose your subscription plan

New feature: guest vouchers for a seamless charging experience

Our new premium feature 'Guest Vouchers' is officially released. With this feature you can offer your guests an easy and relaxed access to your charging stations.

All your guests need is a smartphone and a voucher issued by you: completely without app or annoying payment processes - ideal for a satisfying charging process in the hospitality segment.

You get access to this feature when you book our new subscription package 'Advanced'. For only 5,99 € per charging station per month you can use this function without exception.

If you are interested, we would be very pleased if you contact our sales team. For more information, download the product flyer of the Webasto Charge Connect subscription: https://charging.webasto.com/int/products/documentation/

Reservation feature gets an improved App user interface

Our second premium feature, the reservation function, has received an improved user interface with the latest update. It is now easier for users to see at a glance their reservation timeframe and the assigned charging station in the parking lot.

We are very happy to receive any form of feedback so that we can continue to develop the reservation function together with our users in the future.
