

# Webasto ChargeConnect Updates May 2023

## Webasto ChargeConnect preparation for TurboConnect integration

With the May update, the stage was set in the ChargeConnect backend for our upcoming connectivity charging station for the US market, the TurboConnect, to be controlled via ChargeConnect.

Any TurboConnect that is connected to the ChargeConnect backend via OCPP can then be added to the user account.

By the end of June at the latest, the download of the ChargeConnect app will be available from the US Apple App Store and Google Play Store.

All the known functions of the ChargeConnect are also available to the users with the TurboConnect.

Product information can be downloaded from the download area of the Webasto Charging website:
